## Relief for your chronic sinusitis symptoms

**Luis G. Marmol, MD, FACS**  
is presenting a new, minimally  
invasive solution to chronic sinusitis;  
proven **Balloon Sinuplasty** technology.

Symptoms to include but not limited to:

- Facial pain, pressure, congestion, or fullness
- Nasal obstruction or blockage
- Nasal discharge / discolored post-nasal discharge
- Loss of smell or taste
- Headache, fatigue, dental pain, halitosis

Sinusitis sufferers require over 18 million office visits and nearly 30 million prescriptions per year. In many, medications are effective. But for others, medications may not be enough to relieve all your symptoms.

For those patients not responding to medication, functional endoscopic sinus surgery is often the necessary step to finding relief. Dr. Marmol is experiencing great success in the patients that have had the Balloon Sinuplasty procedure.
